

Additional Information for Q1 press release

(All figures are in thousands of dollars, except per unit values)

For the quarter ended March 31, 2005, Algonquin Power Income Fund (the “Fund”) reported total revenue of \$40.6 million compared to \$37.2 million for the same period in 2004. Net earnings for the quarter were \$1.8 million compared to \$3.3 million for the same period in 2004. Net earnings per trust unit decreased to \$0.03 in the first quarter of 2005, from \$0.05 earned in the first quarter of 2004. The Fund generated \$0.20 per trust unit of cash available for distribution, compared to \$0.19 during the first quarter of 2004. During the first quarter of 2005, the Fund maintained distributions at \$0.23 per trust unit, consistent with the same period in 2004.

Operating Results

(C\$000)	Q1 2005	Q1 2004
Revenues	40,600	37,220
Net Earnings	1,840	3,336
Distribution to Unitholders	16,015	15,601
Cash Available for Distribution	13,920	13,063
Per Unit		
Net Earnings	0.03	0.05
Distribution to Unitholders	0.23	0.23
Cash Available for Distribution	0.20	0.19

Revenue for the first quarter of 2005 increased primarily due to the inclusion of revenue from the newly acquired landfill gas facilities (LFG) and improved results from the Fund’s co-generation facilities. Net earnings for the first quarter of 2005 were lower than the prior year, mainly as a result of higher interest expenses during the first quarter of 2005 versus the first quarter of 2004, offset partly by a decrease in unrealized foreign exchange losses. The Fund also posted a future tax expense during the first quarter of 2005 compared to a future tax recovery in the first quarter of 2004.

The Fund completed the acquisition of five water and wastewater facilities on March 11, 2005. In addition the Fund intends to complete the acquisition of three water and wastewater facilities in Missouri when regulatory approval is obtained.

This information is supplemental to and should be read in conjunction with the Fund’s unaudited consolidated financial statements and the related Management’s Discussion and Analysis for the three months ended March 31, 2005, as well as the audited consolidated financial statements and the related Management’s Discussion and Analysis contained in the 2004 Annual Report. The Fund’s financial statements are prepared in accordance with accounting principles generally accepted in Canada. The Fund’s reporting currency is the Canadian dollar.

The term ‘cash available for distribution’ is used throughout this document. ‘Cash available for distribution’ is not a recognized measure under accounting principles generally accepted in Canada. The Fund’s method of calculating ‘cash available for distribution’ may differ from methods used by other companies and accordingly may not be comparable to similar measures presented by other companies. A calculation of ‘cash available for distribution’ can be found in this information package.

(C\$000)	Q1 2005	Q1 2004

Expenses		
Operating Expenses	\$ (3,416)	\$ (4,349)
Interest and Other Income	\$ 121	\$ 71
Division Operating Profit	\$ 6,724	\$ 6,734
(includes Interest and Other Income)		

First quarter revenue from the Hydroelectric Division was \$10.0 million in 2005 compared to \$11.0 million in 2004. During the first quarter of 2005, the Fund's hydroelectric facilities generated electricity equal to 87% of long term averages compared to 96% during the same period in the prior year. This represented an overall decrease in production of 9.2% in the first quarter of 2005 compared to the first quarter of 2004. The Quebec and Ontario regions posted the largest decreases in energy production due to cold weather and consequential ice. The New York and New England regions showed improved energy generation over the same period in the prior year and the western region remained consistent over the same period in the prior year.

Operating expenses decreased to \$3.4 million for the first quarter of 2005 compared to \$4.3 million in the first quarter of 2004. The reduction is primarily due to lower repair and maintenance costs experienced during the first quarter of 2005.

The Division's operating profit of \$6.7 million for the first quarter of 2005 was consistent with the operating profit generated for the same period in 2004. Operating profit was below management's expectations primarily due to lower than the long term average hydrological conditions.

Outlook

Prolonged cold weather in the Ontario and Quebec regions in which the Fund's hydroelectric facilities are located have delayed the spring thaw, contributing to the reduced hydrology compared to the same period last year. In addition, repairs on the St. Lawrence Seaway over an extended period resulted in lower water levels in the St. Lawrence River and reduced production at another of the Fund's larger facilities at Cote Ste. Catherine. One of the Fund's larger facilities, Long Sault, which accounts for 20% of the total gross revenue, also experienced significantly reduced hydrological conditions. Accordingly, it is expected that the Hydroelectric Division will improve at average to above average levels during the second quarter.

(C\$000)	Q1 2005	Q1 2004
Performance (MW-hrs sold)	131,625	134,110
Revenues		
Energy Sales	\$ 17,919	\$ 16,021
Expenses		
Operating Expenses	\$ (13,151)	\$ (12,418)
Interest and Dividend Income	\$ 718	\$ 1,146
Division Operating Profit	\$ 5,486	\$ 4,749
(includes Interest and Dividend Income)		

First quarter revenue from the Cogeneration Division totaled \$17.9 million in 2005 compared to \$16.0 million in 2004. The increase was in part a result of higher energy sales to the paper mill and improved pricing due to natural gas price indexing at the Windsor Locks facility, as well as the 2004 results being negatively impacted by a gas turbine failure at the Sanger facility. The Fund posted lower dividend income earned by the portfolio investments during the first quarter in 2005 compared to the same period in 2004 due to the sale of the Cardinal Notes in the second quarter of 2004.

Operating expenses increased to \$13.2 million in the first quarter of 2005 from \$12.4 million in the first quarter of 2004. Higher fuel costs were posted by the division resulting from the Sanger facility operating for the full quarter with no interruption during the first quarter of 2005 and higher operating costs due to increased energy demand from the adjacent paper mill at the Windsor Locks facility.

Operating profit for the first quarter of 2005 was \$5.5 million compared to \$4.7 million in the first quarter of 2004. Operating profit for the first quarter of 2005 exceeded management's expectations.

Outlook

The Fund's focus will be on maintaining the reliable supply of generation from all facilities and pursuing opportunities to realize additional revenue. The Fund will continue to consider the sale of contracted natural gas when favourable pricing in the natural gas markets exists. In addition the Fund will assess opportunities to maximize returns on its assets, including renegotiating the energy contracts.

Operating Expenses	\$ (6,101)	\$ (3,225)
Interest and Dividend Income	\$ 918	\$ 218
Division Operating Profit (includes Interest and Dividend Income)	\$ 2,285	\$ 1,913

First quarter revenue from the Alternative Fuels Division totaled \$7.5 million in 2005 compared to \$4.9 million in 2004. The increase in energy revenue in the first quarter of 2005 over the same period in 2004, was primarily the result of the inclusion of revenue from the LFG facilities. The LFG facilities, which were acquired at the end of the third quarter in 2004, contributed approximately \$2.8 million (U.S. \$2.3 million). The revenue added by LFG was partially offset by lower waste quantities processed at the Algonquin Energy-from-Waste facility (“Peel”) due to equipment problems during the beginning of the quarter and continued issues with the flue gas systems and an unplanned outage at the Valley Power facility. The Fund posted higher interest and dividend income earned by the portfolio investments during the first quarter in 2005 as a result of income from the AirSource Power Fund I LP (“AirSource”) loan as well as the addition of the Across America LFG LLC note. The Across America note was funded at the end of the third quarter in 2004. Funding for the AirSource note initially began at the end of November 2004. At the end of the first quarter of 2005, the Fund had advanced to AirSource a total of \$6.5 million. Subsequent to the end of the quarter, the Fund advanced another \$10.5 million to AirSource.

Operating expenses were \$6.1 million for the first quarter of 2005, compared to \$3.2 million in 2004. The increase in expenses was primarily caused by the inclusion of operating costs from the LFG facilities of approximately \$2.3 million, which were purchased at the end of the third quarter in 2004. The Fund incurred higher repair and maintenance costs at the Valley Power facility compared to the same period in the prior year as a result of an unplanned outage and the acceleration of a planned major maintenance into the first quarter originally scheduled for April. The costs of the repairs associated with the unplanned outage are being claimed under applicable insurance, after taking into consideration an insurance deductible of \$100,000 per occurrence. In addition, during the first quarter of 2005, higher costs were incurred at the Peel facility as compared to the same period in 2004 as a result of management changes at the facility. Higher repairs and maintenance costs were incurred at the Peel facility due to the costs associated with the installation of new filter cartridges.

On April 5, 2005, management at the Peel facility successfully concluded its negotiations with its production employees, resulting in the ratification of a new, three year collective bargaining agreement. This collective bargaining agreement was in line with management’s expectations.

Operating profit for this period amounted to \$2.3 million in 2005 as compared to \$1.9 million in the first quarter of 2004. Operating profit was below management's expectations primarily due to lower revenue and higher costs at Peel and Valley Power.

Outlook

At the Peel facility, new air filter cartridges were installed which improve air flow and burning efficiency. Accordingly, a higher throughput of waste is anticipated in the second quarter. Improvements continue at the LFG facilities and as a result these facilities are expected to perform closer to their potential. With the scheduled maintenance completed ahead of expectations at Valley Power, this facility is also anticipated to perform well in the second quarter. The Fund has notified the limited partners of the gas distribution facilities of its intention to terminate operations at the Joliet facility. The Joliet assets were written off at the end of 2004.

INFRASTRUCTURE DIVISION

(C\$000)	Q1 2005	Q1 2004
Number of		
Water reclamation customers	22,589	19,362
Water distribution customers	22,330	18,333
Revenues		
Water Reclamation and Distribution	\$ 5,194	\$ 5,267
Expenses		
Operating Expenses	\$ (2,489)	\$ (2,601)
Other Income	\$ -	\$ 3
Division Operating Profit (includes Other Income)	\$ 2,705	\$ 2,669

First quarter revenue from the Infrastructure Division totaled \$5.2 million in 2005 compared to \$5.3 million in 2004. The decrease in revenue is primarily the result of lower water sales at Litchfield Park Services Company ("Litchfield Park") in the quarter due to much higher than normal rain in the Arizona regions where the Fund's facilities primarily operate. This was offset by continued strong organic growth from an expanding customer base as well as the purchase, on March 11, 2005, of five water and wastewater facilities in Texas and Illinois.

Operating expenses decreased slightly to \$2.5 million in the first quarter of 2005 from \$2.6 million in the first quarter of 2004. This decrease is primarily due to reduced costs resulting from lower water sales, offset by higher wastewater costs resulting from the wet weather.

Operating profit for the first quarter of 2005 remained consistent with the first quarter of 2004 at \$2.7 million. Operating profit was below management's expectations, primarily due to lower water sales resulting from high rains.

Outlook

Management anticipates the division will perform on budget during the upcoming quarter. Organic growth in the customer base of the Fund's water distribution and reclamation facilities is expected to continue in 2005 at similar rates achieved since the end of the first quarter of 2004. Excluding the impact of the facilities purchased late in the quarter, the wastewater facilities experienced annualized growth of 8% in the first quarter of 2005 while the water facilities experienced annualized growth of 10% in the first quarter of 2005. The Division's largest system, Litchfield Park in Arizona, is located in one of the fastest growing counties in the United States.

Administrative expenses

(C\$000)	Q1 2005	Q1 2004
Administrative Expenses	\$1,245	\$1,299
Management Costs	206	188
Withholding Taxes	153	81
(Gain) / Loss on foreign exchange	332	1,410
Interest Expense	3,884	2,682
Income Tax Expense (Recovery)	1,141	(581)
Other Income	(47)	(432)

Note: Interest and administrative expenses are included for all divisions.

Administrative expenses were \$1.2 million for the first quarter of 2005 compared to \$1.3 million for the first quarter of 2004.

The Fund posted an unrealized foreign exchange loss of \$0.3 million in the first quarter of 2005 versus a loss of \$1.4 million in the first quarter of 2004 as a result of strengthening of the US dollar versus the Canadian dollar. This strengthening impacted the US dollar denominated loans of the Fund. At the end of the first quarter, the Fund had approximately \$42.4 million in US dollar denominated debt.

Interest expense increased to \$3.9 million in the first quarter of 2005 from \$2.7 million in the first quarter of 2004 as a result of the issuance of \$85 million in convertible debentures at the beginning of the third quarter of 2004.

Other income declined to \$47,000 from \$432,000 primarily because in 2004 a break fee was earned by the Fund as a result of a failed transaction. During the first quarter of 2005 the figure only included interest income.

Cash Available for Distribution

(C\$000)	Q1 2005	Q1 2004
Cash Flow from operating activities	\$1,770	\$11,322
Changes in working capital	10,055	1,223
Operating cash flow before working capital changes	11,825	12,545
Receipt of principal on notes receivable	1,708	1,527
Decrease / (increase) in reserves	91	5
Repayment of long-term liabilities	(238)	(182)
Maintenance capital expenditures	(452)	(536)
Commitment Fee Received from AirSource	988	0
Other	(2)	(296)
Cash Available for Distribution	\$13,920	\$13,063
Cash Available for Distribution per Trust Unit	\$0.20	\$0.19
Distribution to Unitholders	\$16,015	\$15,601
Distributions to Unitholders per Trust Unit	\$0.23	\$0.23

During the first quarter of 2005, the Fund generated \$13.9 million of cash available for distribution compared to \$13.1 million in the same period in 2004. On a per unit basis, the Fund generated \$0.20 of cash available for distribution for the first quarter of 2005 compared to \$0.19 during the first quarter of 2004. The Fund distributed \$16.0 million during the first quarter of 2005 as compared to \$15.6 million in the first quarter of 2004. On a per unit basis, the Fund maintained distributions at \$0.23 per trust unit for the first quarter of 2005, consistent with 2004.

Liquidity and Capital Reserves

At the end of the first quarter of 2005 the Fund had \$9.1 million of cash and cash equivalents. At March 31, 2005 the Fund had a positive net working capital of \$2.2 million. During 2005, the Fund has also added a \$20.0 million operating line of credit from which nil was drawn at the end of the first quarter of 2005.

Long-term liabilities increased to \$128.1 million at the end of the first quarter 2005 compared to \$120.1 million at the end of 2004. The increase was a result of borrowing an additional \$8.0 million for the acquisition of five waste water facilities during the first quarter of 2005. At the end of the first quarter of 2005, the Fund had drawn \$37.9 million on the acquisition line of credit compared to \$30.0 million at the end of 2004. In addition, \$10.5 million was borrowed in April 2005 to fund additional requirements by AirSource.

At the end of the first quarter of 2005 the Fund maintained a long-term debt (including long term liabilities, other long term liabilities and convertible debentures) to equity ratio of 46.2 per cent. When the convertible debentures are excluded from this calculation, the long term debt to equity ratio is reduced to 24.2 per cent.

Contractual Obligations

Information concerning contractual obligations is shown below:

	Total	Due less than 1 year	Due 2 to 3 years	Due 4 to 5 years	Due after 5 years
Long-term debt obligations	214,015	950	2,169	2,596	208,300
Other obligations	9,948	713	4,808	622	3,805
Total obligations	223,963	1,663	6,977	3,218	212,105

Dealings with Algonquin Power Group

During the first quarter of 2005 companies related to the Manager provided operations and technical services on a cost-recovery basis. Details of the quarterly payments are outlined in note 6 of the first quarter financial statements.

Risk Management

The Fund continues to diversify its operations, both operationally (Hydro, Cogeneration, Alternative Fuels and Infrastructure) and geographically (Canada and US). The Fund continues to enjoy the benefits of forward contracts to hedge its U.S. dollar exchange rate exposure relative to expected future monthly cash flows. At the end of the first quarter of 2005, the Fund had forward contracts to sell US dollars for the remainder of 2005 totalling US \$20.5 million at an average rate of \$1.40 Cdn per US dollar. The Fund has entered into forward contracts that provide similar fixed exchange rate protection for 2006 to the beginning of 2010 totalling US\$ 82.2 million carrying an average rate of \$1.38. The Fund's policy is not to utilize derivative financial instruments for trading or speculative purposes.

The Fund has fixed the price of its natural gas exposure until 2006 at the Sanger facility and to 2007 at the Algonquin Energy-from-Waste facility. After this time, the Algonquin Energy-from-Waste facility is the Fund's only natural gas exposure as the other facilities have pass through provisions in their energy agreements. Natural gas at the Algonquin Energy-from-Waste facility will be re-contracted on a rolling basis.

The Fund has adequate insurance on all of its facilities. This includes property and casualty, boiler and machinery and liability insurance.

Subsequent Event

Subsequent to the end of the quarter, the Fund's Joliet facility provided notice to the limited partners of the gas collection systems and to the landfill operator of its intention to terminate operations at the Joliet facility. The Joliet facility has become uneconomical to operate.

Outlook

The Fund will continue to identify opportunities to optimize the performance of its portfolio. Management is focusing its efforts on integrating recently acquired facilities including the LFG facilities and water/waste water facilities and identifying efficiency opportunities to enhance unitholder value. Assuming continuing average long-term hydrologic conditions, further organic growth in water distribution and reclamation services, expansion of generating capacity of the LFG facilities as gas production continues to increase with additional waste placement, drawdown of the commitment to

provide subordinated debt to AirSource Power Fund I LP coupled with no unforeseen events, the Fund is expecting to generate cash available for distribution consistent with anticipated distributions for 2005.

The Fund will continue to look for opportunities to expand and continue its diversification strategy.

The Fund continues to be an industry leader in the areas of the environment and health and safety. The Fund maintains continuous health and safety training for all its operations and maintenance staff. All of the Fund's facilities are in compliance in all material respects with local and federal environmental regulations. The Fund continues to upgrade the facilities' environmental controls utilizing best available technology.

The Fund plans to invest in information technology to reduce administrative costs by continuing the implementation of supply chain management systems and integrated billing and customer protocols.

In keeping with emerging securities law requirements, the Fund is in the process of completing the review and documentation of its controls and procedures for annual certification of its financial statements.

Quarterly Financial Information

The following is a summary of unaudited quarterly financial information for the two years ended March 31, 2005.

millions of dollars except per trust unit amounts

Algonquin Power Income Fund
Notes to the Consolidated Financial Statements
For the three months ended March 31, 2005 and March 31, 2004
(in thousands of Canadian dollars except as noted)
(unaudited)

1. Basis of Presentation

These interim consolidated financial statements should be read in conjunction with the consolidated financial statements for the year ended December 31, 2004, as set out in the 2004 Annual Report since they do not contain all the disclosures that are in accordance with Canadian generally accepted accounting principles for annual financial statements. These consolidated financial statements have been prepared in accordance with Canadian generally accepted accounting principles, using the same accounting policies and methods of computation as were used for the audited consolidated financial statements for the year ended December 31, 2004.

2. Seasonality

The operations of the Fund are seasonal. The Fund’s hydroelectric energy assets are primarily “run-of-the-river” and as such fluctuate with the natural water flows. During the winter and summer periods, flows are generally slower while during the spring and fall periods flows are heavier.

3. Acquisition of facility

On March 11, 2005, the Fund purchased all the assets used in the operation of five water and waste water facilities (the “systems”) from Silverleaf Resorts Inc. for cash consideration of \$11.2 million (US \$ 9.4 million) of which \$10.9 million has been paid during the first quarter of 2005. The systems, which in aggregate serve approximately 5,500 equivalent residential connections, are located in Texas and Illinois. The purchase and sale agreement provides for the acquisition of three additional assets located in Missouri serving approximately 1,500 customers, for a purchase price of \$4.6 million (US \$3.8 million). The acquisition of the Missouri assets requires formal approval from the regulator in the state of Missouri. The Fund has deposited \$4.6 million (US \$3.8 million) in an escrow account to be released when the purchase of the Missouri assets is approved. This amount has been included in funds held in reserve on the balance sheet. The Fund also incurred \$0.4 million (US \$0.3 million) of acquisition costs.

The acquisition has been accounted for using the purchase method, with earnings from operations included from the date of acquisition. The consideration paid by the Fund has been allocated to net assets acquired as follows:

Fixed assets	\$ 8,939
Intangible assets	2,710
Total Purchase Price	<u>\$ 11,649</u>

Intangible assets include customer relationships which are amortized over 40 years.

The purchase price allocation has been based on the best information available at the reporting date; however, adjustments to the purchase price and purchase price allocation may be made in subsequent quarters as more information is obtained

Algonquin Power Income Fund
Notes to the Consolidated Financial Statements
For the three months ended March 31, 2005 and March 31, 2004
(in thousands of Canadian dollars except as noted)
(unaudited)

In accordance with the purchase and sale agreement for Litchfield Park Service Company and Woodmark Utility Company, the Fund is required to make additional payments to the previous owners for each additional customer connected to the utility. For Litchfield Park, these payments continue until 2008 and for Woodmark until 2007. As of March 31, 2005 the Fund has accrued \$662 (U.S \$539) as a growth premium, and increased intangible assets by a similar amount, gross of future tax liabilities of \$414.

4. Commitment fee

During the first quarter 2005, the Fund has provided an additional \$1.0 million of financing to AirSource Power Fund I LP (“AirSource”) in connection with the construction of a wind farm in St. Leon, Manitoba. The Fund also received a \$1.0 million commitment fee, recorded as deferred credits at March 31, 2005. The fee will be amortized over the term of the financing facility. The Fund’s total commitment to AirSource is \$69.3 million. At the end of the first quarter of 2005, the Fund has advanced \$6.5 million to AirSource in addition to providing letters of credit of \$15.4 million, for total utilization of the commitment of \$21.9 million. Subsequent to the end of the quarter, the Fund advanced an additional \$10.5 million to AirSource.

5. Long term debt

During the first quarter 2005, the Fund drew an additional \$8.0 million on the revolving credit facility to fund the acquisition of the eight water and waste water facilities in Texas, Missouri and Illinois (note 3). Subsequent to the end of the quarter, the Fund drew an additional \$10.5 million to fund requirements of AirSource.

6. Algonquin Power Group

During the quarter, and in accordance with the management agreement, on a cost recovery basis, the Fund paid Algonquin Power Management Inc. (“APMI”) and its related companies for services provided on a cost recovery basis. During the first quarter of 2005, the Fund paid APMI \$206 (2004 - \$188) for management services. In addition, the Fund paid Algonquin Power Systems Inc. \$2,995 (2004 - \$2,926) and Algonquin Water Services Inc. \$1,216 (2004 - \$1,009) for direct operation services.

7. Segmented Information

The Fund and its subsidiaries operate in the independent power industry in both Canada and the United States. Information on operations by geographic area is as follows:
